Can you find out what the missing digits are in this column me

	Th	Н	Т	0
_	1	2	8	4
	2	2	3	0

Flaming hot

Logan was practising subtracting using the formal column method with two four digit numbers

___ = __ = ___ = ___

His larger number had a digit total of 35.

His smaller number had a digit total of 2.

What could Logan's calculation be?

Challenge can you find more than one answer?
